PROFESSIONAL SUMMARY

Fresher Java Backend Developer with a strong technical foundation and hands-on experience building database-driven applications using Java, OOP, JDBC, SQL, and MySQL. Skilled in developing server-side logic with Java Servlets, integrating relational databases, and writing clean, maintainable code following MVC design principles. Quick learner with strong problem-solving ability and eagerness to contribute to scalable, real-world backend systems as part of a collaborative development team.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript (basic)

Core Computer Science Concepts: Object-Oriented Programming (OOP), Data Structures fundamentals, MVC Architecture

Backend Technologies: Java Servlets, JDBC, REST APIs, JSON Parsing

Database: MySQL, SQL (DDL, DML, CRUD Operations)

Frontend Technologies: HTML, CSS

Developer Tools & Server: VS Code, Apache Tomcat

Version Control: Git (basics)

PROJECTS

Weather Forecast Application | *Java, MySQL, JDBC, JSON*

- Engineered a Java-based application to retrieve and process real-time weather data through external API integration, applying JSON parsing to handle dynamic response data.
- Connected the application to a MySQL database via JDBC to store and manage weather records, ensuring accurate and consistent data retrieval.
- Implemented structured data handling logic to maintain reliability of weather data across repeated API calls.

User Registration System | *Java (Swing), MySQL, JDBC*

- Built a Java Swing desktop application with JDBC connectivity to MySQL, enabling structured storage and retrieval of user data.
- Applied form validation and secure data-handling logic to maintain data integrity and prevent invalid database entries.
- Designed an intuitive desktop UI to streamline user data entry and reduce input errors.

Company Website | *Java Servlets, Apache Tomcat, MySQL, HTML, CSS*

- Developed a dynamic, database-backed company website using Java Servlets and MySQL, following MVC architecture to separate business logic from presentation.
- Configured server-side request handling and JDBC connectivity to support efficient, reliable data flow between the application and database.
- Structured HTML and CSS front-end pages for a clean, responsive browsing experience.

INTERNSHIP EXPERIENCE

UI/UX Design Intern — iLife Technology

- Designed user-friendly web and mobile interfaces by creating wireframes, mockups, and interactive prototypes, strengthening understanding of user-centered design principles applicable to full-stack development.

EDUCATION

B.Sc. Information Technology

Jamal Mohamed College, Bharathidasan University 2022 – 2025

CGPA: 7.63

CERTIFICATIONS

- Java Programming Certification — Agno Academy (Apr 2026 – May 2026)
- Full Stack Development Certification — Greens Technology (Dec 2024 – May 2025)
- UI/UX Design Certification — iLife Technology (Jan 2024 – Feb 2024)
